EasyCharge Nature Case

An alternative to plastic or mixed materials, the case of this wireless charger is made of a 100% natural material: *diatomite*

Wireless Charger made of natural diatomite with 10 Watt output and Type-C connector for wireless charging of all modern smartphones by simply placing them on it. With anti-slip and scratch-preventing cork application on the back, LED status display and large area for your full-size advertising print. A sustainable and practical web gift!

Diatomite or diatomaceous earth is a natural sedimentary layer that has formed over thousands of years in freshwater lakes. It consists of the shells of fossil diatoms – mainly silicon dioxide. Its beneficial properties have been used in various industries for a long time.

PRINT INCLUDED!

10641-00-IND

RFID Blocker Card

This active fieldblocker card protects your entire wallet from RFID / NFC spying attempts. Needing no battery, the card draws its energy from the scan source and builds up an electronic protective field that makes all 13.56 Mhz cards (credit cards, EC cards, ID cards, etc.) invisible to any scanners. No additional RFID protective cover necessary.

Digital printing on both sides included. Supplied in a sustainable teabag.

Size: 85,5 x 54 x 1,6 mm; Material: PVC

Digital printing: both sides, full-surface

10957-00

DataBlocker

USB Datablocker protects your devices from data theft, tampering or damage on foreign USB ports while charging. The built-in hardware prevents a physical data line and thus protects your mobile device. Especially when travelling, at airports, hotels or train stations, it can never be ruled out that an unwanted data transfer takes place or that your device is infected with malware.

Standard: Aluminium; from 500 pcs. in ABS (black) or sustainable wheat straw plastic. Other colours and materials available on request.

Size: 42,5 x 19 x 10 mm; Versions: Aluminium, ABS, wheat straw plastic

Pad printing: 25 x 13 mm; Digital printing: 30 x 16 mm; Engraving: 30 x 8 mm

More privacy: Our webcam covers

ultra-thin sliding covers for PCs, smart TVs, laptops, tablets or external webcams.

Very simple privacy protection by simply closing and opening the shutter. Uncomplicated application due to self-adhesive surface. Supplied on a freely designable carrier board in the format of a business card. Full-surface, double-sided advertising print included. Ideal as an individual give-away, customer mailing or employee gift.

Minimum order quantity: 500 pcs.

11003-00

Webcam Cover v2

Available in black or white. Also in special colour according to Pantone for an additional charge.

Size: 30 x 14 x 1,4 mm; Material: ABS

Pad printing on the cover: 12 x 9 mm

11008-00-SIL

MyDome

Easy-to-use two-person pop-up tent for hiking, festivals, gardening and much more. Ultralight and extremely space-saving in its carrying bag (not much bigger than a pizza box). Thanks to the innovative pop-up system, the tent dome unfolds automatically, making pitching and dismantling child's play. The oxford cloth floor covering and the hard-wearing material protect against moisture and allow good ventilation.

With your logo on the transport bag and tent entrance, your brand gets out into the green!
XXL logo print on tent entrance and bag included!

Size: 2.100 x 1.300 x 1.050 mm
Material: Oxford fabric, 170 polyester taffeta, 5.0 fibreglass
Standard colour: silver grey / black; minimum quantity 100 pcs.

Print, two positions: 300 x 400 mm

10993-00-IND

Hang Over

Ultralight travel hammock made of parachute nylon. Practical and comfortable for camping, hiking or at the beach. King-size for maximum comfort, yet lightweight and space-saving when stored in a sewn-on portable bag. Robust and loadable up to 200 kg thanks to excellent workmanship and included heavy-duty tree-friendly straps or carabiners. Easy to clean and quick drying.

Price includes logo label on bag! Available in many standard colours. From 2,000 pieces XL logo print on hammock or completely in desired colour for an extra charge.

Size: 285 x 170 cm
Material: Parachute Nylon

Patch: 65 x 40 mm included

And here comes the matching outdoor lighting to go with it!

10662-00-SCH

Solar Flame LED

Stable, wireless LED garden torch with integrated solar panels and additional charging option via USB. Recharges automatically in daylight thanks to the surrounding sensor and conjures up atmospheric lighting at night. Deceptively real flickering of a warm flame is imitated by powerful LED technology. Weatherproof thanks to IP44 protection class.

Size: 780 x 120 x 120 mm
Material: ABS
Battery: 1.200 mAh / 3,7 V / 4,44 Wh
Splash protection: IP44

1C Pad printing: 30 x 30 mm

ENGRAVING INCLUDED IN PRICE

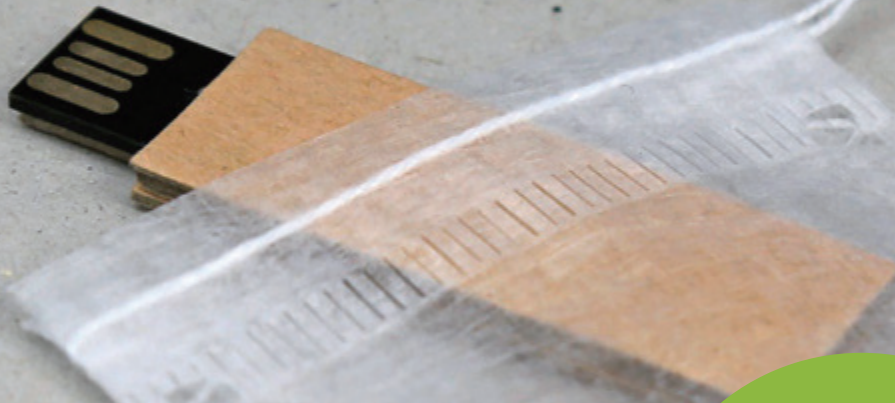

re:think packaging

The free standard packaging for our USB sticks is our compostable **USB tea bag**. Perfectly protecting your goods from scratches and a 100% compostable.

Optionally, we offer a variety of additional outer packaging as well as exclusive gift boxes for your USB sticks.

A lovely and sustainable solution is the **USB Seedbox!** Not only looking great, but also giving a little piece back to nature: the handmade paper contains incorporated plant seeds. So after use, simply plant it and it will start to sprout.

Standing out in the best way!
**USB flash drives as
three-dimensional special shape**

Unique, exclusive and precisely tailored to your company: We realise your 100% individual USB idea!

There are no limits to your imagination: Your brand as an USB patch, your product or service as a miniature or the key visual of your advertising campaign – we will realise your ideas professionally.

From the first draft up to the production of your stick in silicone, PVC, metal, wood and much more.

Your customised USB creation will inspire customers at trade fairs or meetings and draw positive attention to your company.

ADVERTISING APPLICATION

Take the opportunity to make your advertising media campaign a complete success with an individual branding. The possibilities are manifold: At any time and without obligation we like to provide you advise to find the optimal creative or technical solution for you. In advance we listed a few general remarks on the individual procedures and technical conditions:

PAD PRINTING

Pad printing is one of the most important methods for printing on advertising materials. Because of the flexibility of the Padsall conceivable surface forms even rounded shapes can be printed.

LASER ENGRAVING

For a permanent water- and smudge-resistant label, the surface of the object to be inscribed is machined by a laser beam. So almost all the graphic forms and fonts can be lasered onto your products.

DIGITAL PRINT

The digital printing process has the advantage that the corresponding print data are received directly from the computer to the printing press. A printing form is thus not required. Your data as image or vector file and with C / M / Y / K color mode – will be applied in four-color printing.

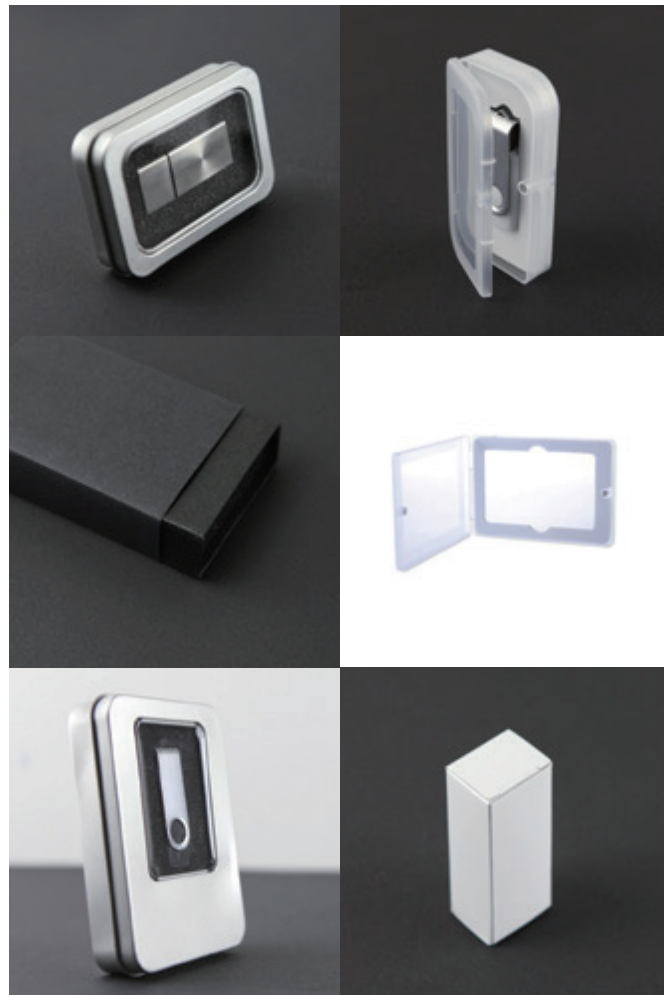

DOMING

Your logo as offset or digital printing will be implemented, and subsequently coated with a transparent resin. So your logo is well protected and comes to their best advantage. Domings are possible on many products.

PACKAGING

For us, functional and appealing packaging is part of a good product. Because the first impression is decisive. That's why our standard packaging is functional, simple and sustainable, made of unbleached, brown kraft cardboard.

Please also ask us about our additional packaging options, for example for USB sticks (see below) or finishing options for the standard packaging, for example with advertising print or bandaroles.

Just a few examples of USB add-on packaging:
Box 50 / Box 105 – Magnetic flap box / USB Box 146
Box 100 / Box 106
