Small Bottle. BIG IMPACT.

Each Ocean Bottle purchased funds the collection of 1000 plastic bottles entering the ocean. That's 11.368kgs of plastic. You can make an impact on ocean plastic today! The funds from the purchase of an Ocean Bottle go towards local communities living near plastic waste streams, who are paid Fairtrade International wages for the collection of ocean-bound plastic. This is all made possible with the help of Plastic Bank and powered by a traceable IBM blockchain verified plastic collection system. The double wall insulation keeps your cold drinks cold and your hot drinks hot. Designed with a dual opening function the leak proof lid gives you the option to sip from the spout and the base and provides easy access for filling, cleaning and adding ice.

MADE FROM WASTE, TO END WASTE.

We believe that Circular Design can save the world.

Circular Design is a workable solution at a time when the world desperately needs solutions. We create products made with recycled materials, designed to last and fully recyclable. We work to a simple yet immensely challenging rule of 100-10-100. Any product created can only be justified if it's trying to or helping to achieve 100% recycled content, designed for at least 10 years use and then 100% recyclable at the end of its useful life.

1.  **Make from recycled materials.**
2.  **Design to last.**
3.  **Ensure 100% recyclable.**

the Future is Circular.

THE END OF GREENWASHING

TRANSPARENCY, TRACEABILITY, AND GENUINE SUSTAINABLE IMPACT

We believe true sustainability can only be achieved when there is transparency and traceability. Without genuine proof of the use of recycled materials in a product, all sustainability claims can be considered greenwashing. Our IMPACT and CHANGE collections aim to end greenwashing and lead our industry in a new direction.

IMPACT THE POWER OF TRACEABILITY

BIO BOTTLES MADE IN THE NETHERLANDS

Tacx

BIO BOTTLES MADE IN THE NETHERLANDS

Tacx Are you looking for a bottle fully made of biodegradable materials? Then the Bio-Bottle of Tacx is a great choice. It stands out because the plastic of the bottle is biodegradable. Adding a small amount of bio-material changes the molecular structure so the material finally breaks up in biogas and biomass. This feeds the soil and it's completely absorbed by nature. The process of disintegration starts when the bottle ends up at a microbiological environment (compost heap, waste disposal).

- Bamboo eternity pencil writes upto 20,000 metres
- Replaces 100 traditional wooden pencils
- No sharpening needed

WIEN 877 - ETERNITY

eco-neutral Bamboo eternity pencil replaces your traditional wooden pencil. Traditional wooden pencils write only up to around 200 metres, but this bamboo eternity pencil, has a writing length of up to around 20,000 metres using a graphite tip to produce a graphite line. Not only does it write like a pencil, but the markings can be erased. It works by leaving a graphite line on paper just like a regular traditional wooden pencil but it wears down so slowly, that it should outlast up to 100 traditional wooden pencils!

WHAT IS

RECYCLED PET FELT?

PET (Polyethylene terephthalate) is a type of plastic. As long as it is not mixed with other materials, it can be recycled many times. In high temperatures, PET becomes liquid and can be easily shaped, helped by the fact that it quickly hardens.

- **FUNCTION & STYLE:** The felt material in a unisex colourway is perfect for use in home or office. It is made up from plastic or metal organisers. The soft surface dampens noise from pens and bumping, preventing damage and clattering.
- **ORGANIZED EVERY DAY:** Bring order to your day, whether at home or at the office. The organiser is perfect to tidy up desk drawers, kitchen storage areas, cupboards, bedsides or console tables.

Some interesting facts
about the sustainability of

RECYCLED STAINLESS STEEL

Stainless steel is 100% recyclable, and it can be recycled without any loss of quality. This means that stainless steel products can be used, recycled, and reused indefinitely .

According to the International Stainless Steel Forum (ISSF), about 85% of stainless steel is recycled at the end of its life. This high recycling rate is attributed to its economic value and the well-established recycling infrastructure .

The recycling process consumes less energy compared to the production from raw materials . Significant environmental impact. It conserves natural resources, reduces energy consumption, and lowers greenhouse gas emissions .

Conserving Our World with **RECYCLED ALUMINUM**

Aluminum may be the most versatile product and building material on the planet.

It is lightweight and highly flexible, but also super-strong when combined with other metals such as magnesium, copper, molybdenum and silicon. It is non-magnetic, has high thermal conductivity, and is extremely resistant to corrosion. It can be easily cast, machined, bent, welded, tapered and alloyed, and it does not degrade with repeated reuse.

THE PROCESS OF RECYCLING ALUMINUM:

1. SORTING

2. SHREDDING

3. CLEANING

4. MELTING

5. COMPOUNDING

"On a worldwide basis, approximately 67% of all aluminum cans purchased by consumers are recycled, which makes these cans the most recycled container in the world"

WHEAT STRAW MATERIAL

Utilizing wheat straw for new products helps reduce agricultural waste, which would otherwise be burned or left to decompose, contributing to air pollution and greenhouse gas emissions.

MANUFACTURING PROCESS

ALL YOU NEED TO KNOW ABOUT RECYCLING WHEAT STRAW MATERIAL

COLLECTION AND CLEANING

1 Wheat straw is collected post-harvest and cleaned to remove impurities.

PULPING

2 The cleaned straw undergoes a pulping process to break it down into fibers, which can then be molded or processed into various products.

MOLDING & PROCESSING

3 The straw fibers are molded into various shapes or combined with other materials to create composite products.

WHEAT LUNCH KIT | E6050

A Sustainable single layer lunch box made of recycled wheat straw material with PP and bamboo cover. Has Spoon, Fork and Knife in a brown elastic band for better closure.

RECYCLED GENUINE LEATHER MATERIAL

“Leather products are durable and do not decompose easily, contributing to long-term waste if not recycled...”

Recycling leather is a vital practice for promoting sustainability. It addresses critical environmental issues, supports economic growth through job creation and cost savings, and encourages sustainable consumption and production patterns. By incorporating recycled leather into the supply chain, industries and consumers can significantly contribute to a more sustainable and ethical future.

TOXIC CHEMICAL REDUCTION

Recycled leather processes often involve fewer chemicals, reducing environmental pollution and improving safety for workers and communities.

RECYCLED MILK CARTON MATERIAL

Recycled milk carton material, also known as paperboard, is a composite material primarily made of paper fibers, with a thin layer of polyethylene and, in some cases, aluminum. These cartons are used for packaging milk, juice, and other beverages. They are collected, sorted, and processed to create a valuable and sustainable raw material.

The journey of a recycled milk carton begins in the recycling bin. Once collected, the cartons are transported to a recycling facility where they undergo a series of processes:

SORTING

Cartons are separated from other recyclables to ensure a clean, uncontaminated stream of material.

PULPING

The cartons are mixed with water in a large blender, breaking them down into a slurry.

SCREENING

The slurry is screened to remove any remaining contaminants. The paper fibers are then cleaned and prepared for reuse.

REFORMING

The clean paper fibers are pressed and dried to form new paper products or materials like construction boards and tissues.

Milky Note White is a stylish and functional note that is perfect for taking notes, jotting down ideas, or leaving messages. Made from high-quality paper and features a sleek, modern design. The Milky Note White is available in white.
